

**Description**

After Madelyn's death was reported to the jurisdictional vital records office via an A04 message from the EHR, a nurse at Llewellyn Hospital realized that Madelyn's first name had been entered incorrectly into the hospital's EHR as "Madeline." The nurse updates the decedent's first name in the medical record with the correct spelling. The updated record for Madelyn Smith is transmitted via an ADT^A08 message from the EHR to the jurisdictional vital records office.

**Comments**

No Comments

**Pre Condition**

A04-Report message is sent before the A08-Revise message.

**Post Condition**

No PostCondition

**Test Objectives**

This test case examines the ability of an EHR to create an ADT A08 message for revising of relevant clinical information to the Electronic Death Registration System (EDRS).

Support for revised patient name.

**Evaluation Criteria**

No evaluation criteria

**Notes for Testers**
